

Stem EC based irrigation controller

“Israeli scientists have developed a new device that taps into the stem of a tree and when water levels are low, the tree can text a message, email the farmer, or turn on the irrigation tap to water itself.”

<http://baku.mfa.gov.il/mfm/Data/157769.pdf>

Israel Develops “Text Messaging Plants: “Feed Me Seymour” Israeli scientists have developed a product that enables plants to tell farmers that they are hungry or even turn on the water itself.
